

Ontario Investing Nearly \$118 Million to Improve Credit Valley Hospital

Province Putting Patients First by Improving Access to Health Care in Mississauga

NEWS

June 11, 2015

Ontario is investing up to \$117.74 million to support the redevelopment of Trillium Health Partners' Credit Valley Hospital site to give patients faster access to high quality care. The project includes renovations to approximately 187,000 square feet of existing hospital space.

Through this project, patients in Mississauga will benefit from:

- An expanded emergency department to more than double the current size with new paediatric and mental health treatment areas; 22 new treatment bays offering improved patient privacy; and 16 temporary treatment bays to ensure adequate capacity during construction
- An expanded surgical and peri-operative suite
- Two new operating rooms and associated post-anaesthetic care spaces
- An expanded critical care unit more than double the current size with five new beds
- An expanded diagnostic imaging department that will have new, state-of-the-art equipment.

Construction at Credit Valley Hospital is now underway and is expected to be complete in the spring of 2018.

Investing in priority infrastructure, including hospitals, is part of the government's plan to build Ontario up. The four-part plan includes investing in people's talents and skills, making the largest investment in public infrastructure in Ontario's history, creating a dynamic, innovative environment where business thrives, and building a secure retirement savings plan.

QUOTES

"Today marks an important milestone in the redevelopment of Trillium Health Partners' Credit Valley Hospital site. Once the project is completed, the Credit Valley Hospital will provide patients in Mississauga with better access to emergency and critical care services, close to home."

— Dr. Eric Hoskins, Minister of Health and Long-Term Care

"With construction now underway, we look forward to the completion of the Credit Valley Hospital redevelopment project. This project will provide better access to high-quality hospital services closer to home for patients and families in Mississauga."

— Harinder S. Takhar, MPP for Mississauga-Erindale

"This phase of redevelopment will help us to better meet the emergent and critical care needs of our growing and changing community. It is good news for patients and comes at a fitting time, as we celebrate the 30th anniversary of the Credit Valley Hospital site."

— Michelle DiEmanuele, President and CEO, Trillium Health Partners

QUICK FACTS

- Ontario is investing more than \$130 billion over ten years in public infrastructure, including roads, bridges, transit, hospitals and schools. Modernizing infrastructure will support an estimated 110,000 jobs per year, in construction and related industries. The province's

infrastructure investments are supported by unlocking the value of provincial assets, including broadening the ownership of Hydro One and reforming Ontario's beverage alcohol system.

- Infrastructure Ontario and the Ministry of Health and Long-Term Care are working with Trillium Health Partners to renovate Credit Valley Hospital, which will remain publicly owned, controlled and accountable.
- Infrastructure Ontario has completed more than 47 infrastructure projects to date, of which 31 are in the health care sector, including hospice, rehab and research centres. Credit Valley Hospital is one of 24 infrastructure projects currently under construction, of which 15 are health care or hospital projects.
- Infrastructure Ontario and Trillium Health Partners have awarded a fixed-price contract to Walsh Canada to build and finance the Credit Valley Hospital redevelopment project.
