

### **Trillium Health Partners Confirms Third and Fourth Case of COVID-19**

Trillium Health Partners (THP) received confirmation of positive COVID-19 test results from two patients who were assessed in hospital on Tuesday, March 10. One patient was assessed at the Mississauga Hospital's Emergency Department. The other patient was assessed at Queensway Health Centre Urgent Care.

The patients presented with symptoms and recent travel history. Given the patients' conditions, it was not necessary for either patient to be admitted to hospital. Both individuals were discharged home to follow self-isolation protocols. THP immediately notified Public Health and has been working in partnership with them.

In both cases, the patients were isolated immediately and all necessary precautions were taken to ensure the safety of staff and other patients.

Mississauga Hospital and Queensway Health Centre remain open and clinics and procedures will continue to operate as normal. The hospital remains safe for patients and visitors.
